

Ewelina Celińska – Poland

Department of Biotechnology and Food Microbiology, Poznan University of Life Sciences, Poznan, Poland.

Ewelina Celińska is a Professor of Biotechnology at Poznan University of Life Sciences, where she leads a small research team working in the field of yeast genetic engineering and molecular biotechnology. The team studies the biology of and applies different approaches to turn yeasts, mainly *Yarrowia lipolytica*, into efficient producers and secretors of recombinant proteins. She is a member of the FEMS Yeast Research Editorial Board and a member of the International Commission on Yeasts.
