

## **Huseyin Erten – Türkiye**

Department of Food Engineering, Faculty of Engineering, Cukurova University, Türkiye

Huseyin Erten is the full professor of Department of Food Engineering, Faculty of Engineering, Cukurova University, Türkiye. He received a BSc in Food Science and Technology from Çukurova University (1987) and a MSc in Food Microbiology from Reading University (1993). He was qualified with a PhD in Biotechnology from the Department of Biological Sciences and ICBD, Heriot-Watt University (1997). His research area is fermentation microbiology and technology, mainly yeasts and lactic acid bacteria and their roles in the fermentation industry. He has published over 200 research papers and reviews of which 79 are published in international reviewed journals. He is co-editor of the books “Food Processing: Strategies for Quality Assessment (2014)”, “Handbook of Vegetable Preservation and Processing (2016)”, “Health and Safety Aspects of Food Processing Technologies (2019)” and “Technology and Microbiology of Fermented Products (in Turkish) (2020)”. He serves as associate editor of *Frontiers in Microbiology* (Food Microbiology Section). He has been elected as Turkish delegate on the International Commission on Yeasts since 2008. He was the chair of “The International Specialized Symposium on Yeasts (ISSY35)” held in Antalya, Türkiye on 21-27th of October, 2019.
